

Team/Project: CSUN Dashboard - White Volley Girls

Team Member #1: Christian Jarmon

What I did since last progress report:

- Reviewed design document and noted what might/will change post-launch
- Started writing algorithms to automatically generate the React code for the Major pages
- Transpiled Flask webserver code to FastAPI for the documentation it generates

Anything holding me up on my last progress report's expected activities:

- N/A

What I plan to do before the next progress report:

- Finish the algorithm that generates the code for the major pages
- Start brainstorming/recording tests

Team Member #2: Michael Balian

What I did since last progress report:

- I got some work done this sprint as I fulfilled some requirements we needed on the front end
- The first requirement was a notification when a class conflict occurred. I implemented this on the front end and also a success notification when a class is added.
- The second requirement would be the cost table for the planner page. This way the user would be able to see an approximate cost when adding classes to the planner.

Anything holding me up on my last progress report's expected activities:

N/A

What I plan to do before the next progress report:

- My biggest struggle has been with the front end UI design. I am hoping to get some ideas to make the page look nicer.

Team Member #3: Nima Shafie

What I did since last progress report:

- Looked into documentation templates for API documentation
- Starting creating documents for API endpoints
- Started researching FastAPI and how to convert from Flask to FastAPI

Anything holding me up on my last progress report's expected activities:

N/A

Team Member #4: David Huezo**What I did since last progress report:**

- Instead of committing anything, I decided it would be best to start learning and using the css portion or React instead of just using the javascript for everything. I think css would help us with a better looking design and cleaner looking code.

Anything holding me up on my last progress report's expected activities:

- A change of plans, I probably will not be the one hooking up the frontend and backend, and instead going to target the design of the pages more.

What I plan to do before the next progress report:

- Start implementing a lot more .css and see if i can change up what we already have.

Date: 4th February

Team Progress (0 -- 3): 3

0 -- no progress has been made by the team

1 -- insufficient progress has been made for the team to complete their capstone

2 -- sufficient progress has been made for the team to complete their capstone

3 -- excellent progress has been made by the team

Report Quality (0 -- 3): 3

0 -- missing or empty report

1 -- report briefly written with incomplete sentences, lacking descriptions of work

2 -- well written report with sufficient description of work performed since last progress report

3 -- excellently written report with detailed description of each team members progress
