

CS 490/491L Progress Template.

Instructions: *Each team member should enter their activities performed for the capstone project in the last two weeks, as well as their expected activities for the next two weeks, along with anything holding them up on completing their activities. These should be discussed by the team and their advisor(s) during the weekly/biweekly meetings, and the advisor(s) should sign and date the sheet indicating a correct assessment of the team's progress. Students need to upload a signed and scanned version to Canvas.. Progress reports uploaded to Canvas without a signature and score for progress will receive a 0 for progress.*

Team/Project Name: CSUN Dashboard - White Volley Girls

Team Member #1: Christian Jarmon

What I did since last progress report:

- Abandoned Account functionality for now.
- Built databases for Professors, Classes, Ratings.
- Finished the parsing algorithms.

Anything holding me up on my last progress report's expected activities:

- N/A

What I plan to do before the next progress report:

- Finish Software Design
- Audit the whole backend.
 - Make development process easier for frontend developers
 - Abstract away the server scripts so they don't have to manually run it
 - Attempt to migrate cloud hosting for all backend data.

Team Member #2: Michael Balian

What I did since last progress report:

- Worked with Christian on analyzing the wire frame he created for the student planner page
- Created page with react for the student planner page, functionality works need to polish on details
- Working on a rough sketch of how our professor ratings page will look
- Made basic react components with static data for the professors ratings page
- Teamed up with David to get an idea of what he has in mind for the majors information page
- Able to fetch and work with backend Nima and Christian worked on

What I did since last progress report:

- Christian made the move to use SQL workbench so I am doing work to get it installed on my pc
- Had to switch two functional components in react to make a child component for button click rendering for each unique item
- Made body portion of the Professors ratings page
- Made basic react components with static data for the professors ratings page
- Discussed with Nima on how we can get the application on heroku

Anything holding me up on my last progress report's expected activities:

N/A

What I plan to do before the next progress report:

Before the next I would love to finish up the ratings page where users can post the ratings. I am first trying to put a page together that's user friendly and easy for users to post ratings. This would be great progress as the functional side of the planner page is working and that connects with the ratings page where users would want to search for a professor before adding the class.

Team Member #3:Nima Shafie

What I did since last progress report:

Attempting to get the backend/frontend working together on Heroku with free hosting (taking a bit longer to do due to the nature of the folder structure along with Python Flask & JavaScript React differences) Configuring Heroku to automatically pull from our

GitHub with our latest commits to prevent manual pushing to Heroku version control.

Paused progress on user registration, spending more time attempting to work on the hosting situation

Anything holding me up on my last progress report's expected activities:

N/A

What I plan to do before the next progress report:

Try to have the software project hosted hopefully on a free service and working properly

Team Member #4: David Huezo

What I did since last progress report:

- Design template for every major page is complete
- The basics of the sign in page have been done

Anything holding me up on my last progress report's expected activities:

- Nothing this time around, I got what I needed to do. few conflicts with merging but easily fixed

What I plan to do before the next progress report:

- For now I do want to finish the sign in page and make it look pretty and add the text box functionality. I will probably start on whatever task Christian needs me to do next.

Date: 27th October

Team Progress (0 -- 3): 3

0 -- no progress has been made by the team

1 -- insufficient progress has been made for the team to complete their capstone

2 -- sufficient progress has been made for the team to complete their capstone

3 -- excellent progress has been made by the team

Report Quality (0 -- 3): 3

0 -- missing or empty report

1 -- report briefly written with incomplete sentences, lacking descriptions of work

2 -- well written report with sufficient description of work performed since last progress report

3 -- excellently written report with detailed description of each team members progress
